JOB DESCRIPTION

Pre-amble

Japan Cycling Federation (JCF) is the recognized authority by the UCI (Union Cycliste International), JSC (Japan Sports Council) and JOC (Japan Olympic Committee) on all aspects of cycling in Japan. JCF is responsible for the management and development of the sport from the national team at the elite level, including Olympic, Paralympic and Asian Games.

JCF, through its High-Performance Center (HPC), aims to create and sustain an effective system that develops talented Japanese track cyclists to achieve Olympic, Paralympic and World Championship medal performances.

Short Description

Monitor and record sporting performances, liaising with coaches and athletes in training and competition environments to leverage performance.

Reports to

Performance Science Coordinator

Main Responsibilities (include but are not limited to)

- Set up a fixed and stable environment where all the devices/technology can be ready to use during Track and Strength and Conditioning training sessions.
- Filming of training at designated sprint (including JIK/HPD) and endurance track training session. Rapidly make this video footage viewable for athletes and coaches (within 60 to 90 seconds) after the performance has finished.
- Operating timing system during track training sessions.
- Managing powermeters pre- and post-sessions.
- Assisting with performance data management, including downloading, storing, tagging and marking files in the appropriate organization's folder.
- Work alongside the Science Team to include Performance Analysis and use objective data and information (video and numerical) to impact performance.
- Assisting other Performance Analyst where required.
- Work alongside the Science Team to assist with the calibration and maintenance of devices when required.

- Assist in documenting processes and procedures for achieving quality policies and objectives within your area of work.
- Provide camp and/or competition support, both domestically and internationally as deemed necessary by the Head Coaches and Technical Director.
- Stay updated with sports requirements by locating and reviewing sports specific webs, journal resources and competitor technologies.
- Any other work linked with your area of expertise and which is assigned by a superior.

Requirements (include but are not limited to)

- Degree or specific courses in sports science, performance analysis, biomechanics, physiology, or a related area in the sports field.
- Strong knowledge and skills using technology.

Key Competencies and Behaviors (include but are not limited to)

- Problem solving capability.
- Ability to work with attention to detail.
- Good people skills and team player within a multidisciplinary high-performance team environment.
- Excellent communication, organisation and computer skills.
- Good command of the English language – both verbal and written.

General

- Travel throughout Japan and internationally will be required.
